The DoorBird IP Door Chime is extremely versatile and aesthetically designed to fit in your home. The chime is an ideal addition to every DoorBird door station. It can be flexibly installed on a wall or the ceiling of your home. The connection of the door chime to the network can be made via WiFi or via network cable. The chime can also be powered conveniently via Power-over-Ethernet (PoE).

The network-based door chime is configured via the DoorBird App. In addition to the volume and the multiple ringtones it is also possible to set the door chime to a do not disturb mode (individual time ranges). A DoorBird door station can be connected to an unlimited number of

door chimes and the door chime supports an unlimited number of door stations.

A separate ringtone can be assigned for every DoorBird door station. The door chime can also operate exclusively over the local area network (LAN), if the Internet has failed in the short term. In addition, a storey-call button can be connected to the door chime via two-wire cable and, an individual ringtone profile can be configured for this purpose. The resident always knows immediately if the doorbell was pushed at the main door or the apartment door.
