

Shelly[®] 1PM

Wi-Fi relay switch with power metering

Control any electrical appliance and measure its consumption

Power metering

Shelly 1PM has integrated precise power meter, which provides you with detailed power consumption.

Power supply

Shelly 1PM is compatible with all major international voltage standards

Wireless 802.11 b/g/n

Shelly 1PM can connect directly to any Wi-Fi network, no HUB required or can operate as an Access Point.

Maximum load

With the 16A max load, you can control a wide range of home appliances and office equipment

Overheating protection

Internal temperature sensor for overheating protection

Embedded web interface

You can set up Shelly without the need of any additional controller or hub, thanks to the embedded web interface.

Mobile app control

Turn devices on/off directly from your smartphone or tablet. You can control lighting, heating and any other connected electrical appliance in your house.

Sunrise/sunset schedules

Shelly 1PM can automatically turn on/off based on the sunrise and sunset hours at home.

Weekly schedules

Choose a time and create custom daily schedules for your devices.
