

Shelly™ 4PRO

The best solution to make your new home smart

Shelly 4Pro is a low-cost home automation device designed especially for newly built homes. No controller needed - with the Shelly Cloud app you can control your home from any place in the world.

Control 4 circuits at a time

With Shelly 4Pro you can control 4 electricity circuits, 10 amperes each (4x2300 W). You can also receive a real-time consumption information.

DIN mountable

Shelly 4Pro is designed to fit in the electrical switchboard next to the breakers in standard electricity box.

Screen

Shelly 4Pro has a 1.8-inch color screen that provides information about the status and consumption of each electricity chain.

Controller? Unnecessary!

Shelly 4Pro doesn't need a controller to be accessible. It can control lights, heating and AC systems, switches and power sockets in your home.

Cloud Connected

With Shelly 4Pro you can control your home directly through your mobile phone, no matter where you are. With smart metering embedded for each circuit, you can check power consumption data for up to a year.

Follow the sun

Shelly knows the sunrise and sunset time at your house location. It can turn on and off automatically, based on your preferences.

24/7 days schedule

Control your home appliances anytime from anywhere. You can send On and Off timer for each day of the week. Do you come back from work at 6:00 PM? No problem, Shelly will prepare your home for you.
