Shelly® BULB

Make your home brighter and colorful

Shelly Bulb is a smart WiFi RGB+W light that allows you to control and adjust the brightness and color of light depending on your mood through the Shelly Cloud application.

Wi-Fi module

Shelly Bulb connects to your home WI-Fi network and you can set the lights color, with a choice of 16 million colors.

Energy Efficient

Shelly consumes up to 9W and like all other Shelly devices is managed by the user's mobile phone.

Countdown timer

No more lights left on! Shelly Bulb can automatically go off after a predefined period.

Follow the sun

Shelly knows the sunrise and sunset time at your home's location. It can turn on and off automatically, based on your preferences.

24/7 day schedule

You can easily simulate presence in your house when you are not at home. The smart bulb can turn itself on and off at certain times, and with its 24 hours timer for each day of the week you can preset exact time when the lights goes on and off.
